

# ZAHA HADID DESIGN

April 4<sup>th</sup>, 2018

Zaha Hadid's pioneering vision redefined architecture and design for the 21st Century and captured imaginations across the globe.

Collaborating with the world's most iconic brands to create exquisite one-off, as well as limited edition pieces, Hadid's works are within some of the world's most respected museum collections and have been showcased at acclaimed retrospective exhibitions worldwide.

She created the 'Zaha Hadid' label for her signature design pieces, each informed by her architectural repertoire. Zaha Hadid Design worked with Hadid to develop the collections, reinterpreting the relationships inherent throughout her architecture.

The 2018 collection conveys the unrivalled innovation within her work. Designed with Hadid's unwavering belief in the power of invention in both traditional and contemporary materials.

Outstanding new pieces continue the fluid lines and subtle, organic geometries that define the collections such as the Node vessels which convey the studio's explorations into the relationship between architecture and nature. Their tops fanning outwards to reveal concentric rings of clearly articulated ridges that appear as waves descending within.

Inspired by cellular structures and the creative possibilities of the material, these vessels advance the technical possibilities of resin casting to achieve a greater degree of subtlety in texture and tone, while their innovative structure expresses the dynamic inversion of gravity evident throughout Hadid's architecture.

Galleria Giovanni Scacchi  
Via Rivoli, 4 20121 Milano  
Tues-Sat 10:00-18:00  
Wed 10:00-20:00  
Sun 11:00-16:00
